Population in India covered under DOTS and Total Tuberculosis Patients put on treatment each quarter

Annualized New Smear-Positive Case Detection Rate and Treatment Success Rate in DOTS areas, 2001 – 2011

•Population projected from 2001 census

•Estimated no. of NSP cases - 75/100,000 population per year (based on recent ARTI report)

Revised National Tuberculosis Control Programme, 1st Quarter, 2011

Dear Colleagues,

It is my great pleasure to inform you that Revised National TB Control Programme (RNTCP) has maintained NSP Case notification (detection) rate of 52/lakh (69%) and treatment success rate of 87.4% in NSP patients at the national level in 1st Quarter 2011 inspite of the fact that case notification rate drops during 1st quarter. The programme while consolidating and sustaining its past achievements is progressing well towards achieving the TB related Millennium Development Goals.

RNTCP Performance in 1st quarter 2011.

During the quarter, over 2.04 million TB suspects were examined, 2,35,008 sputum positive cases were diagnosed and a total 3,69,046 TB cases were registered for treatment under DOTS regimen. The annualized total case notification rate is 121 cases/100,000 population. The new sputum positive case notification rate is 52 per 100,000 populaiton (69%). In addition to this 83,407 new sputum negative cases, 55,229 new extra pulmonary cases and 48,506 sputum positive re-treatment cases were also registered for treatment during the quarter. Treatment success rate among the new sputum positive pulmonary TB cases, registered in 1st quarter 2010, is 87.4% and the sputum conversion rate of patients registered during 4th quarter, 2010 is 90.7%. The default rate among NSP (5.4%), NSN (6.6%), new extra pulmonary (3.6%) and retreatment sputum positive patients (14.1%) shows a declining trend over the past several quarters.

Major Activities during the quarter

Progress in accreditation of Intermediate Reference Laboratories (IRL)

RNTCP has accredited 27 Solid Culture and DST laboratories in the country which includes 4 National reference laboratories, 15 Intermediate Reference laboratories and 8 laboratories from other sectors like Medical Colleges, NGOs and Private sectors, the other 4 laboratories are in the final stages of accreditation. The Line Probe Assay (to detect Isoniazid & Rifampicin resistance) has been introduced in the programme and 3 IRLs and 1 NRL have been accredited to deliver the services, several other labs are in different stages of accreditation.

Progress in the DOTS- Plus services for MDR TB cases.

DOTS Plus services for management of MDR TB are now available in 150 districts covering a population of 331.5 million in 15 states. Till date a total of around 4217 MDR-TB patients are on treatment in these states. Other states are in various stages of preparatory activities for rolling out DOTS-Plus services.

Progress in TB HIV Collaborative Activities

Scale-up of Joint TB/HIV collaborative activities has been hailed by numerous external review missions as one of the success stories of RNTCP and continues to progress impressively. The two programmes aim to achieve nationwide coverage of TB-HIV intensified package by the end of 2011. The performance has been uneven and varied across the states especially in linking HIV-infected TB patients to ART and this requires intensive supervision and monitoring. As we plan for the next five year plan (2012-17), RNTCP and NACP are preparing a joint national strategic plan with inputs from all stakeholders to achieve universal access to TB/HIV care – All TB patients to be tested for HIV and all HIV-infected TB patients to be receiving CPT and ART.

Programme review

A three day meeting of State Health Ministers and Secretaries of Health and Medical Education was held in Hyderabad from 11th to 13th January 2011. After detailed review of the ongoing National Programmes, with a view to strengthen the health programmes the meeting

unanimously adopted certain resolutions. As regards to RNTCP the following resolutions were undertaken:

1. Concerted efforts will be made to improve case detection rate in 100 identified districts where case detection is less than 50% to raise it to 70% by 2012.
2. Multi-Drug Resistant Tuberculosis (MDR-TB) is emerging as a major public health problem in the country and shall be urgently addressed.

Progress in Supervision, Monitoring and Training

Performance Indicators published in quarterly as well as annual status report have been revised through a national consultative process. This Performance report is compiled and published by Central TB Division based on the quarterly reports submitted by the DTOs and STOs through windows based software ‘EPI-CENTRE’ and the same data validated by themselves. The Supervision and Monitoring Strategy for the programme is being revised keeping in view of achieving the objective of Universal Access.

Progress in ACSM activities

Regional ACSM Workshop held for capacity building of states in Chennai from 21st –23rd February, 2011 participants from States of Andhra Pradesh, Karnataka, Kerala, Puduchery, Tamilnadu, Lakshadweep, Andaman & Nicobar and Daman & Diu were present. During this workshop SQSG (State Quality Support Group) was formed in each state to ensure quality support to entire ACSM effort as an ongoing mechanism for continued quality assurance.

World TB Day Event 2011

The World TB Day Event 2011 was strategized keeping the Revised National TB Control Programme objectives and goals: “TB MuktiMashaal” The awareness drive for the World TB Day Event is concentrated around the central idea of a torch that will keep burning till the event tenure and carried to different parts of the Delhi city. The Theme “TB MuktiMashaal” was conceptualised in conjunction with the World Health Organisation’s Global plan to STOP TB theme “On the move against Tuberculosis; Transforming the fight towards elimination”.

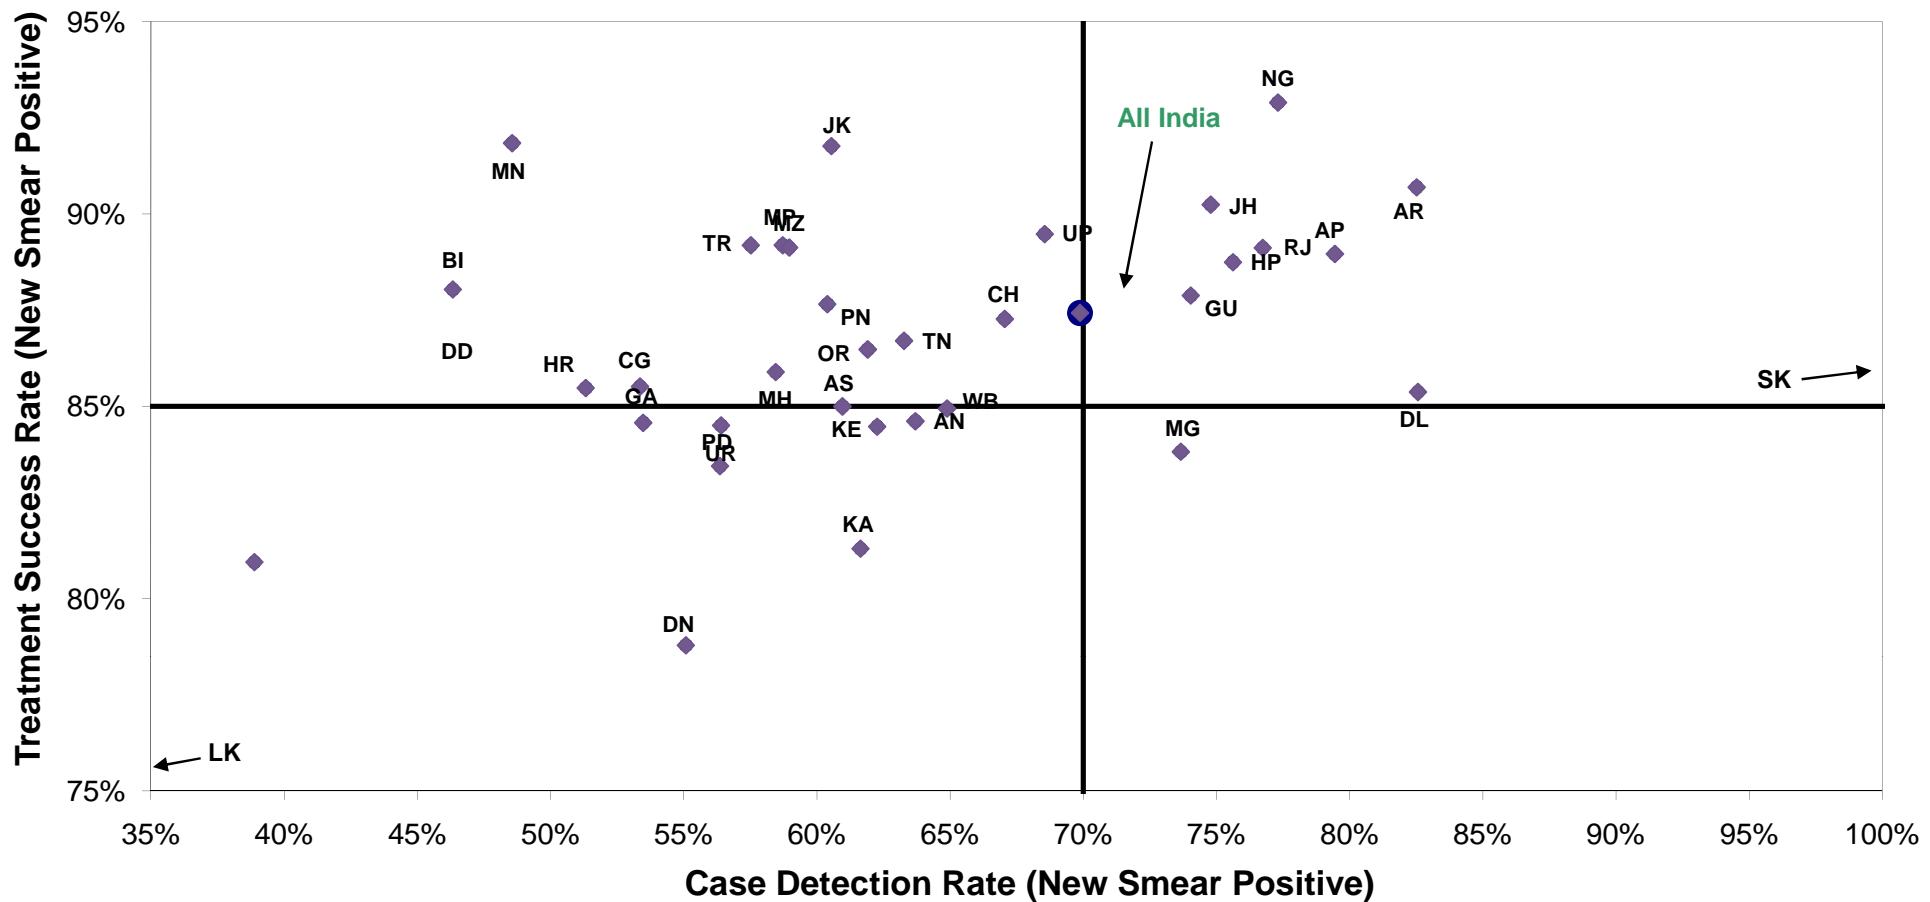

Progress in PPM activities:-

National Consultative Meeting of Partners was conducted in Delhi on 6th-7th January 2011. The Theme of the meeting was: Civil Society contribution to RNTCP planning in next phase. National Consultation on Developing Public-Private Collaboration Strategies for the Revised National Tuberculosis Control Programme (RNTCP) Conducted in New Delhi 17–18 February 2011 with the objective to review public-private collaboration experiences globally and from other health sectors in India, and develop recommendations for engaging the private sector for TB control in India successfully including its scale-up plan.

The programme has made great inroads to the cause of TB control in the country. Central TB Division is actively engaged in developing National Strategic Plan (12th Five Year Plan) for the year 2012-17. This process has been consultative and the inputs are being taken from states and the partners as well as experts in TB control and non governmental organizations.

Dr. Ashok Kumar
Deputy Director General (TB)
Dte. General of Health Services, MOHFW,
Government of India

Case Detection Rate and Treatment Success Rate in RNTCP areas for 1st quarter 2011/2010

* Tribal Districts (more than 50% tribal population)

** Poor/Backward District

† Tribal & Poor/Backward Districts

Estimated New Smear Positive cases / lakh population based on ARTI data for North Zone (Chandigarh, Delhi, Haryana, Himachal Pradesh, Jammu & Kashmir, Punjab, Uttar Pradesh, Uttarakhand) is 95; East Zone (Andaman & Nicobar, Arunachal Pradesh, Assam, Bihar, Jharkhand, Manipur, Meghalaya, Mizoram, Nagaland, Sikkim, Tripura, West Bengal) is 75; South Zone (Andhra Pradesh, Karnataka, Lakshdweep, Pondicherry, Tamil Nadu) is 75 and West Zone (Chhattisgarh, Dadra & Nagar Haveli, Daman & Diu, Goa, Gujarat, Madhya Pradesh, Maharashtra, Rajasthan) is 80; Orissa is 85, Kerala is 50

1 Projected population based on census population of 2001 is used for calculation of case-detection rate. 1 lakh = 100,000 population

2 Smear positive patients diagnosed include new smear positive cases and smear positive retreatment cases

3 Total patients registered for treatment includes new sputum smear positive cases, new smear negative cases, new extra-pulmonary cases, new others ,relapse,failure,TAD and retreatment others

4 Sputum Conversion rate is not expected for new districts that began implementing RNTCP in 4th quarter 2010

5 Cure rate and Success rate are not expected for new districts that began implementing RNTCP after 4th quarter 2009

Values for grey areas are not expected

* Data from Daman & Diu is included in Gujarat

\$ This indicator will be more relevant when S+ve RT cases are considered as MDR TB suspects in all districts in the state

For 2010, these numbers are NOT from the same cohort of patients from which MDR diagnosed are reported, but rather from treatment initiation registers only. The current DOTS Plus information system does not allow for cohort-based reporting of MDR TB suspects, hence this should not yet be taken as a proportion of MDR TB diagnosed and used as an indicator for efficiency of initiation on treatment. Future versions of the DOTS Plus reporting system will be based on cohorts of patients tested in laboratories, and will be used for monitoring of timeliness and efficiency of diagnosis and initiation on treatment

* Data from Daman & Diu is included in Gujarat

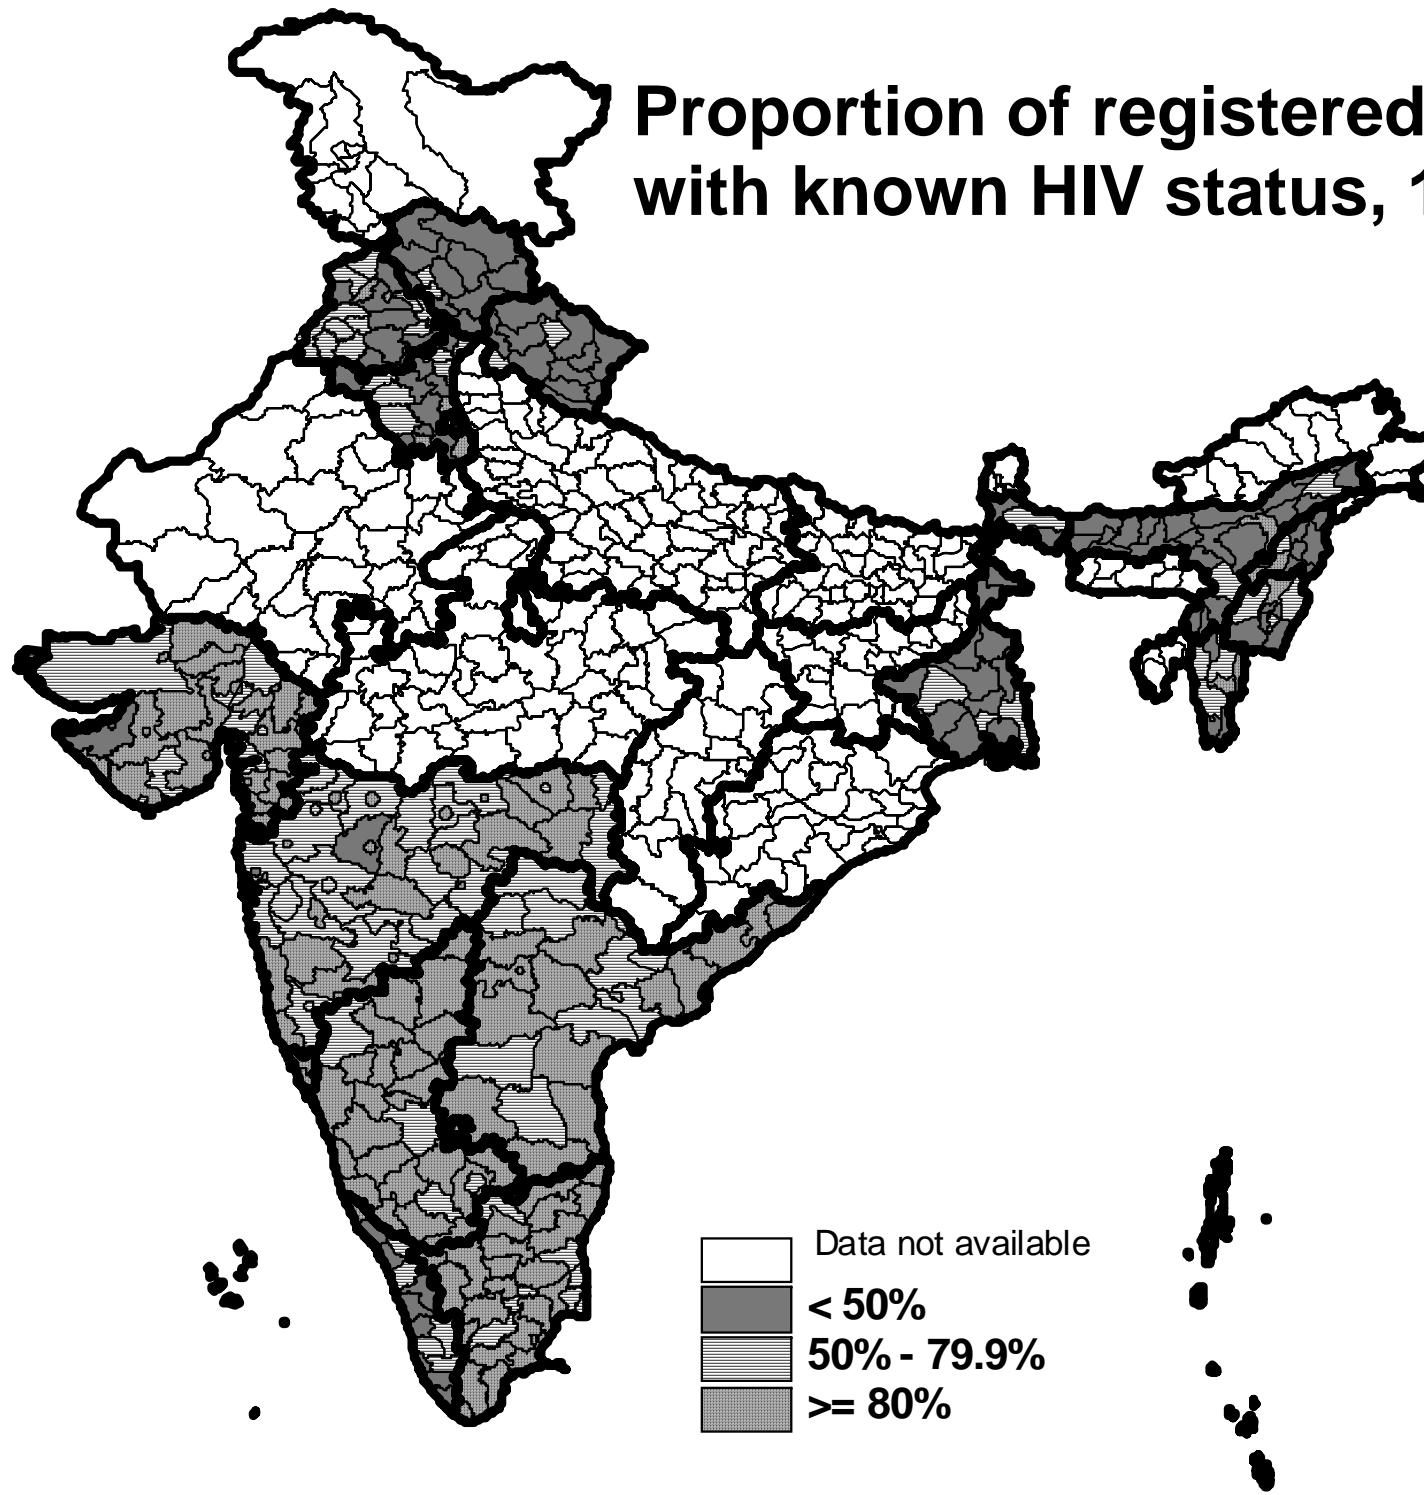

\$ This indicator will be more relevant when S+ve RT cases are considered as MDR TB suspects in all districts in the state

For 2010, these numbers are NOT from the same cohort of patients from which MDR diagnosed are reported, but rather from treatment initiation registers only.

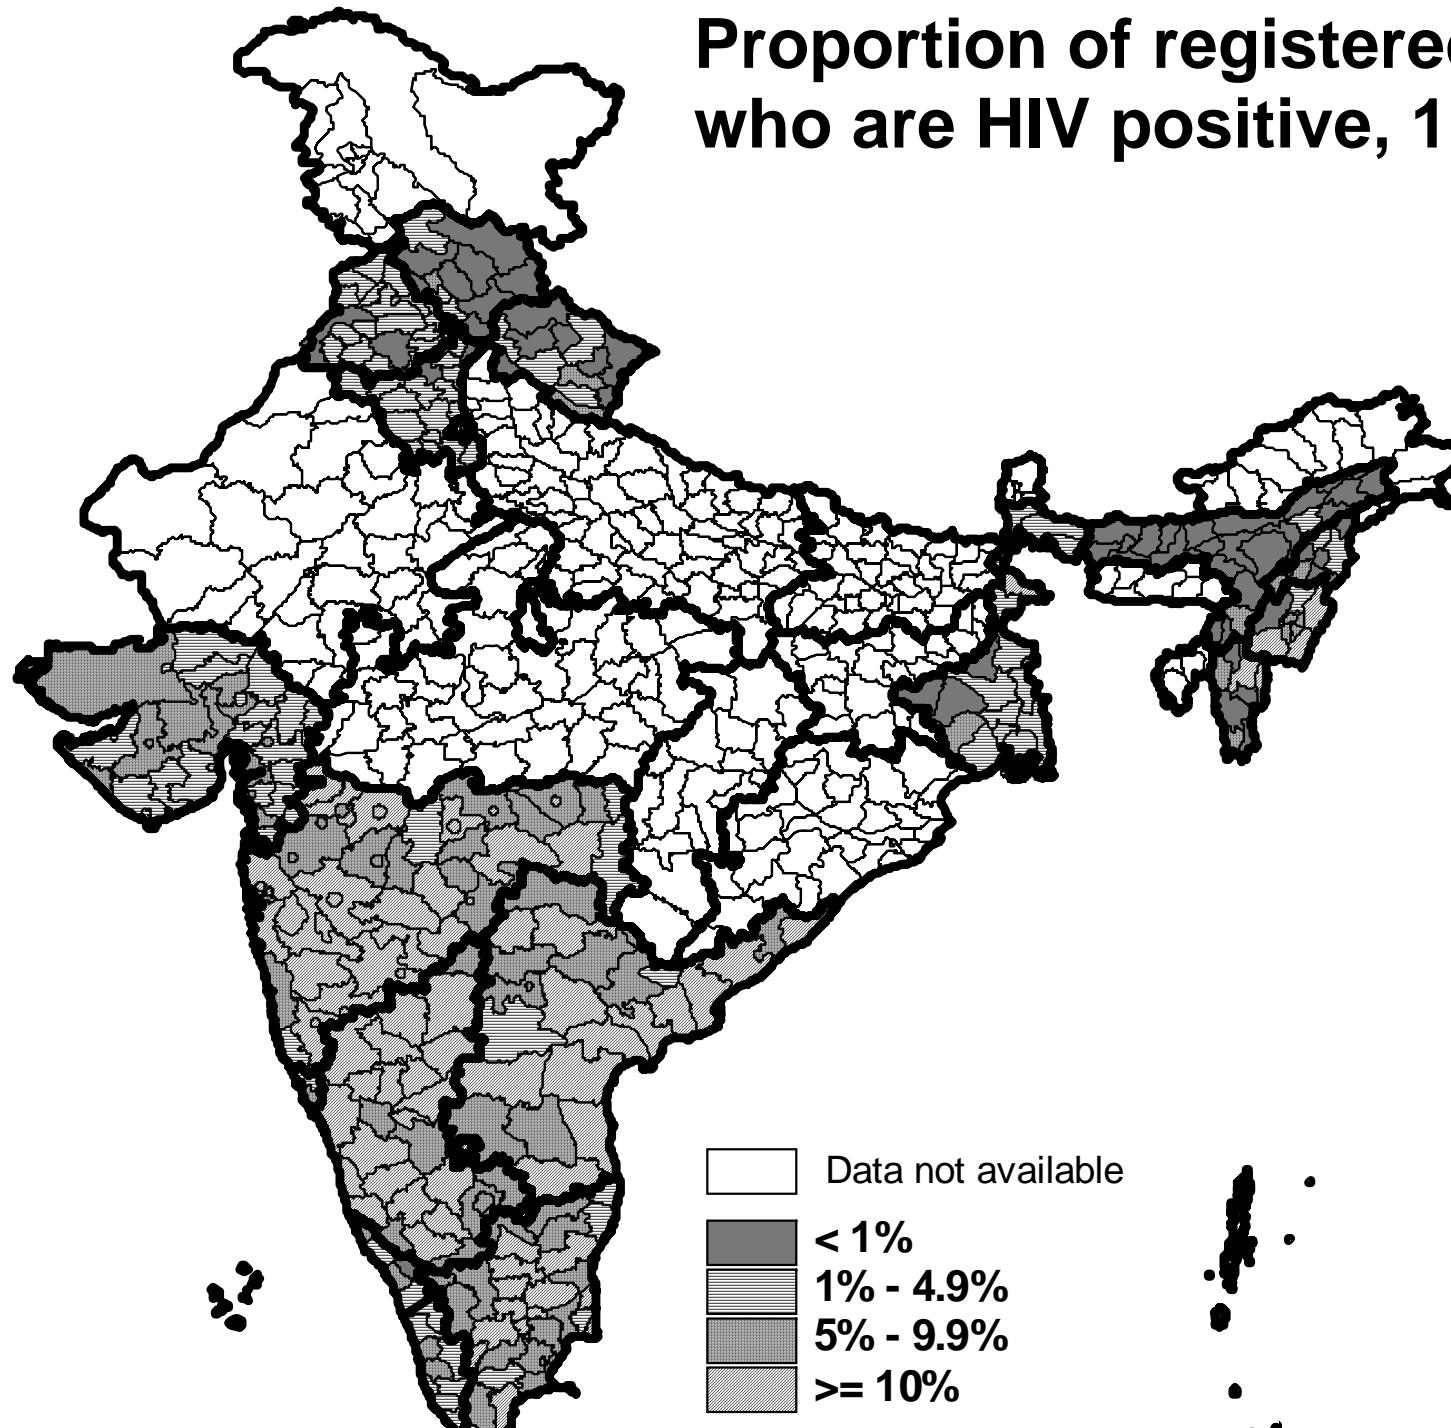

The current DOTS Plus information system does not allow for cohort-based reporting of MDR TB suspects, hence this should not yet be taken as a proportion of MDR TB diagnosed and used as an indicator for efficiency of initiation on treatment. Future versions of the DOTS Plus reporting system will be based on cohorts of patients tested in laboratories, and will be used for monitoring of timeliness and efficiency of diagnosis and initiation on treatment

S.No	Name of the Culture & DST Laboratory	Culture workload (from culture register)		DST workload and results (from DST register)							Laboratory Quality Indicators					
				[DST results summary combined all methods]							Propotion of smear positive diagnostic specimens reported as culture positive		Proportion of all specimens with culture 'contaminated' results		Patients (with diagnostic specimens) with DST completed within the benchmark turn-around time*
