

RNTCP Performance Report, India Fourth Quarter, 2008

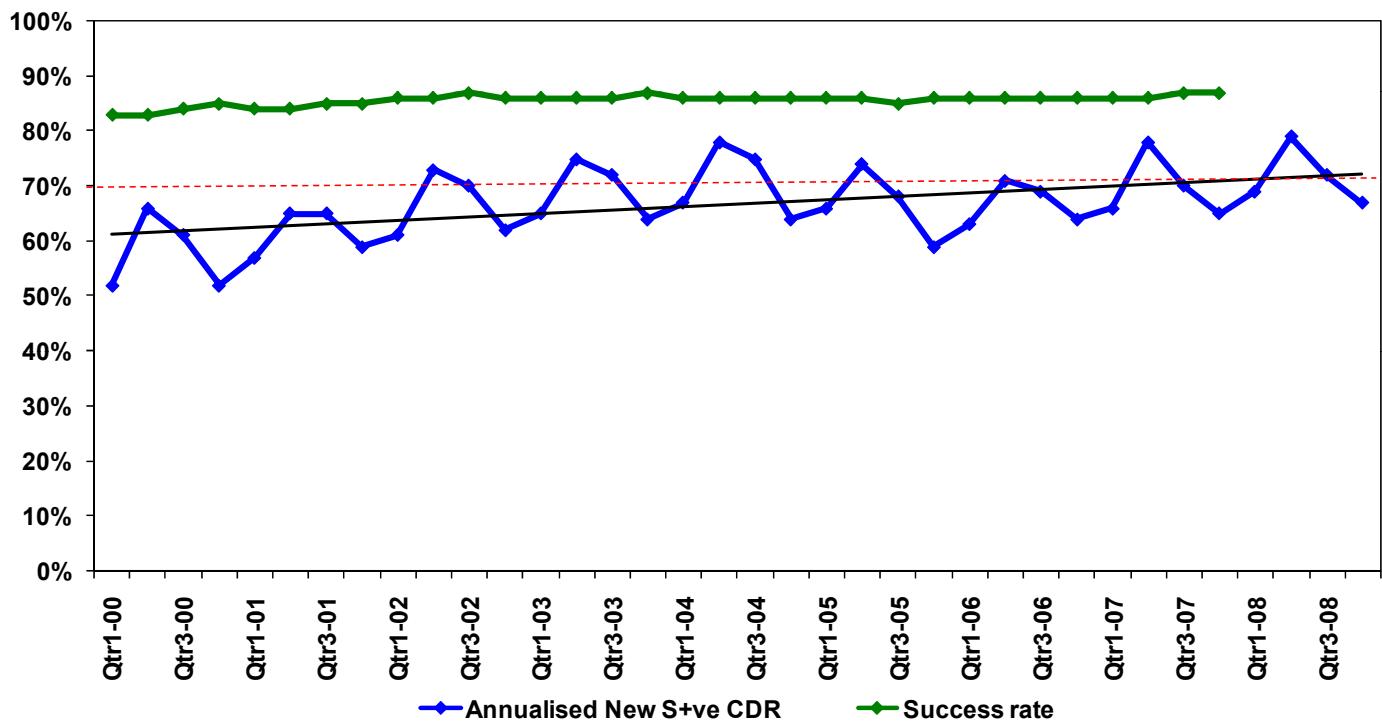

Central TB Division, Directorate General of Health Services
Ministry of Health and Family Welfare, Nirman Bhavan, New Delhi 110108
<http://www.tbcindia.org>

Population in India covered under DOTS and total tuberculosis patients put on treatment each quarter

Annualized new smear-positive case detection rate and treatment success rate in DOTS areas, 2000-2008*

*Estimated no. of NSP cases - 75/100,000 population per year (based on recent ARTI report)

**Revised National Tuberculosis Control Programme
Pursuing High quality DOTS services**

Dear Colleagues,

The programme has achieved the annualized NSP case detection rate of 67% and success rate of 87% at the national level as per the reports submitted at the end of 4Q08. With this, the annualized NSP CDR for the year 2008 is 72% and the programme has once again achieved at the national level the objective of at-least 70% NSP case detection and NSP treatment success of at-least 85%.

RNTCP performance in 4 quarter 2008

During the quarter, over 1.65 million suspects were examined, 207,144 sputum positive cases were diagnosed, and 351,593TB cases were registered for treatment. The annualized total case detection rate is 123 cases per 100,000 populations. The new smear positive PTB case detection rate (annualized) for the 4th quarter 2008 is 67 % of the estimated cases, with a total of 143, 540 new smear positive PTB cases being registered for treatment. In addition, 90,272 new smear negative PTB cases, 49,531 new extra pulmonary TB cases, 46,316 smear positive re-treatment PTB cases and 21,514 'Others' were also initiated on treatment in this quarter. The cure rates and treatment success rate amongst the new smear positive PTB cases registered in the 4th quarter 2007 is 84% and 87% respectively. The sputum conversion rate among the new sputum positive PTB cases registered in 3Q08 is 90%.

The default rates among the NSP (5.6%), NSN (7.2%) and re-treatment cases (14.1%) are showing declining trends. Though the declining trend is encouraging, the current default rates still remain a cause of concern.

Nationally, a representative case control study on Cat-2 defaulters that was undertaken by the Central TB Division had shown that in about one third of the cases, the cause of default was patient migration from one area to another during treatment. In order to further strengthen the 'referral for treatment' and 'transfer out' mechanisms Central TB Division has complied the "national contact details directory". This directory has been placed on the programme's website (www.tbcindia.org) and contains the contact details of State TB Officers, District TB Officers, Medical Officers-Tuberculosis Control, Senior Treatment Supervisors and Senior TB Laboratory Supervisors. I request you all to use this information effectively to provide continuity of TB treatment for patients who migrate/move from one place to another during treatment and thus reducing the default rates further.

Major Activities during the quarter

World Bank Mission

The implementation support mission by World Bank was conducted from 8th to 12th Dec 08. It opined that RNTCP is consolidating its achievements and also continues to achieve the global targets for case detection and cure rate at national level.

The national laboratory committee meeting

The 15th meeting of National lab committee was held in October 2008. The committee has recommended that RNTCP may change the diagnostic criteria of smear positive TB in accordance with new International guidelines such as a Pulmonary TB suspect is any person with cough for two weeks, or more, the number of sputum specimen required for diagnosis is 2, with one of them being a morning sputum, and even one specimen positive out of the two is enough to declare a patient as smear positive TB.

The meeting of the National Task Force on medical colleges

The National Task Force (ZTF) CME and workshop for the involvement of medical colleges was held at the All India Institute of Medical Sciences, New Delhi from 22nd to 24th Oct, 2009. More than 200 participants from various medical colleges across the country participated in the CME and more than 80 medical college faculty who are the members of the National, Zonal and State Force participated in the workshop. It is of interest to note that 267 medical colleges are now providing RNTCP diagnostic and treatment services for patients seeking health care from the medical colleges. The NTF also endorsed the proposed changes in the RNTCP definitions of TB suspect & smear positive TB and the RNTCP recommendations on the number of sputum smear examinations required to diagnose smear positive TB. The other important recommendations made by the NTF will also further strengthen the involvement of medical colleges under the programme.

The second bi-annual meeting of the STOs and RNTCP Medical Consultants

The second bi-annual national review meeting of the STOs and RNTCP medical consultants what held at Agra, Uttar Pradesh from 24th to 26th November, 2009. The focus of this meeting was on the qualitative aspects of RNTCP diagnostic and treatment services. Accordingly, the issues pertaining to the quality of diagnosis and treatment, and the issues pertaining to creating an enabling environment for early and

increased case detection, reducing default, expanding reach and community involvement/empowerment that were highlighted during the meeting needs to be implemented and monitored routinely.

Progress in accreditation of Intermediate Reference Laboratories (IRL)

The IRL of Kerala was accredited under RNTCP in December 2008 and it is currently undertaking culture & DST services for the MDR TB suspects & patients from the state. Another 7 IRLs (Haryana, Rajasthan, West Bengal, Tamil Nadu, Uttarakhand, Chattisgarh, Jharkhand and Orissa) are under the accreditation process and are expected to be accredited in 2009.

During the quarter, the NRLs visited Rajasthan, Pondicherry, Mizoram, Meghalaya and Tripura as part of NRL EQA OSE visits.

Progress in DOTS-Plus services for MDR-TB cases

The states of Andhra Pradesh, Haryana, West Bengal, Kerala and Delhi have started the cat-IV treatment services during the quarter. By the end of this quarter, 252 MDR-TB cases were on RNTCP Category IV treatment in the country. Gujarat and Maharashtra, which began the Category IV services in August 2007, are making encouraging progress. Both these states have expanded their DOTS-Plus services to a few more districts each.

Progress in the involvement of NGOs and PPs

The involvement of health institutions under the Catholic Bishop's Conference of India (CBCI) which began during the 3Q08, have increased their participation in RNTCP during the current quarter by conducting a national level review, 4 state level workshops, >50 sensitization programmes for > 1600 persons, 5 training workshops and had signed 4 MoUs under the new NGO PP schemes.

A meeting of the IMA National Working Group (TB) was held at the IMA headquarters in the month of November to review the progress of the activities that were undertaken by IMA to promote the involvement of private practitioners under RNTCP. During the quarter, the Indian Medical Association (IMA) has sensitized about 2700 private practitioners through 66 CMEs and have trained about 130 private practitioners through the 7 district level training programmes. In doing so, they have created 228 DOT centers and 11 DMCs in the private sector.

Progress in ACSM

Capacity building for key functionaries of the states for ACSM has been one of the important activity during this quarter. Three such Capacity building workshops were held for the state TB Officers, state IEC Officers and Communication Facilitators with the collaboration of National Institute of Health and Family Welfare (NIHFW). These five days training workshops have provided opportunity for key functionaries to plan and implement locally appropriate ACSM activities. These workshops highlighted the importance of ACSM to enhance the programme performance and also to ensure availability of TB services in patient friendly environment.

Besides these with the support of Media agency, hands on training workshops have been planned in six states. The focus of these workshops is to demonstrate effective use of IEC material in the field. New TV and radio spots prepared by the media agency will be aired from Jan 2009. These spots also highlight "Cough more than two weeks" as symptom of TB.

Other major issues/activities

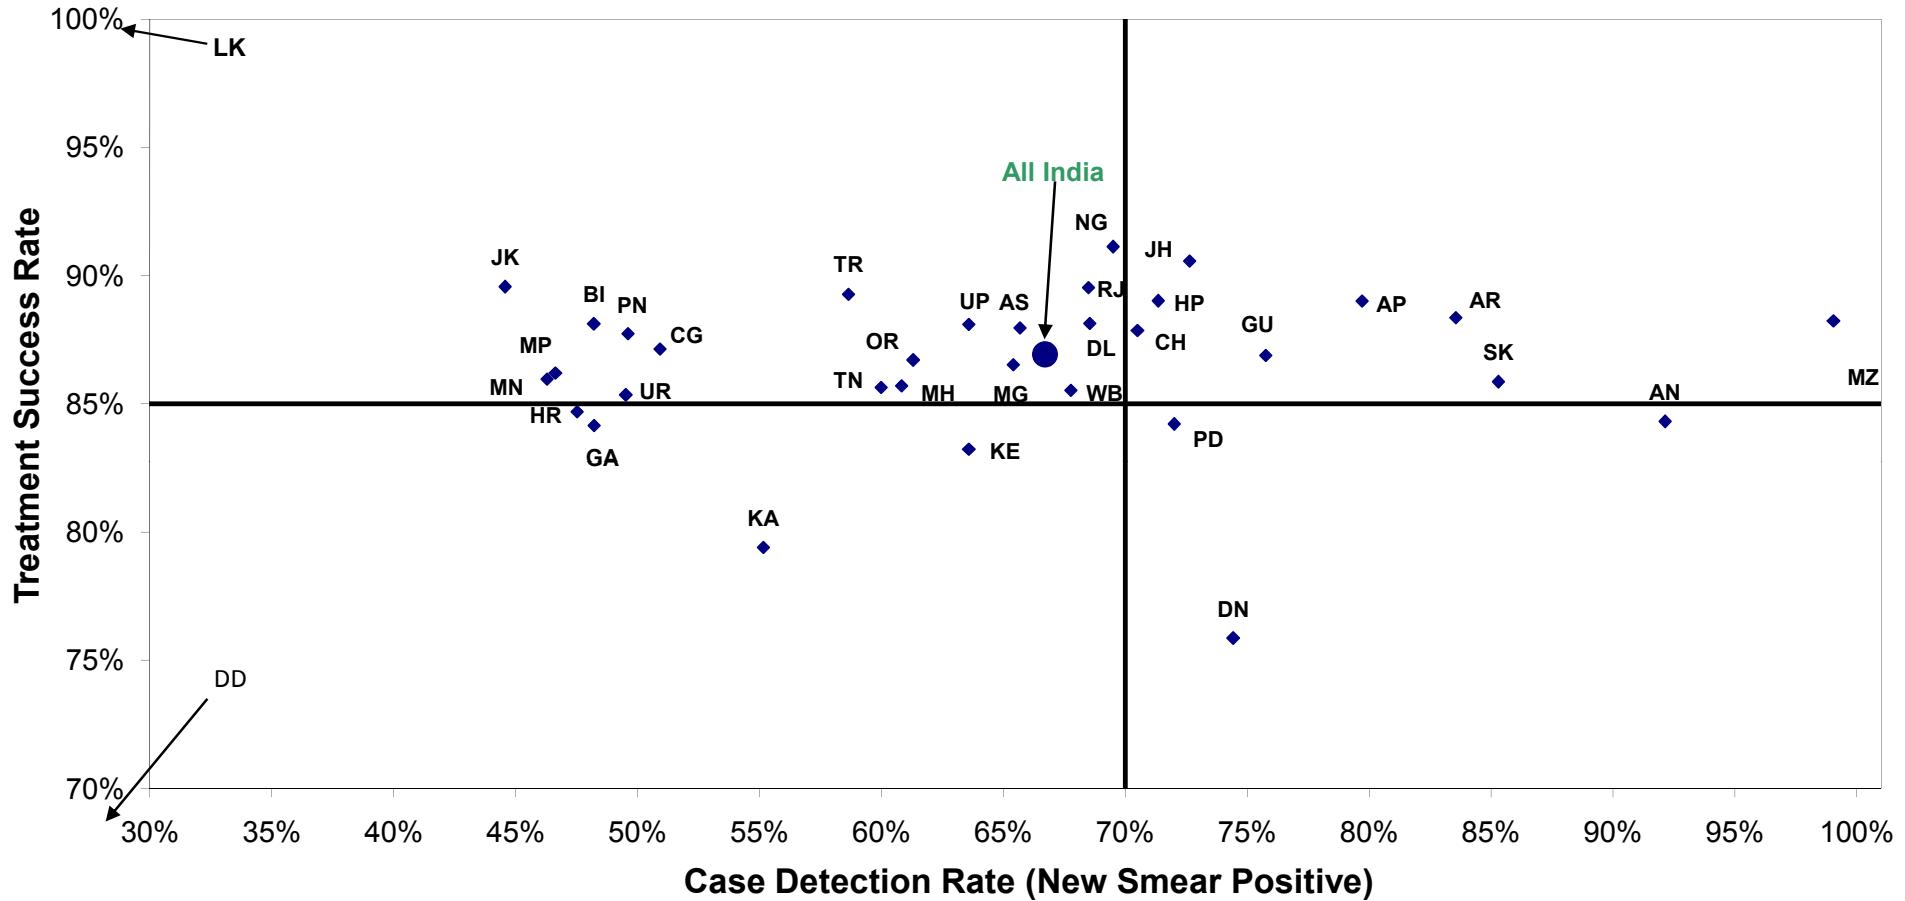

The utilization of pediatric boxes (PC-13, 14, 15 & 16) for treatment of pediatric TB cases under RNTCP and Tab. INH (100 mg.) for chemoprophylaxis, needs to be monitored at all levels to ensure that these drugs are used for eligible TB patients/contacts. This issue has also been discussed in detail at the National Task Force meeting for Medical Colleges held at AIIMS, New Delhi in October, 2008 and during the biannual review meeting of STOs & Consultants, held at Agra in November, 2008 and suitable recommendations have been made for implementation.

The Workshops to improve Drug Logistics Management were held during November & December 2008 at Orissa & Uttar Pradesh respectively by Strategic Alliance Management Services (SAMS).

In conclusion, RNTCP is in its 11th year of implementation, and has made DOTS services available throughout the country. The programme has initiated DOTS Plus for the management of MDR TB. Progress has been made in TB HIV collaborative activities and involvement of all health care providers under the programme. We are proud of our achievement, and aware of the challenges that lie ahead to sustain basic quality DOTs, expansion of DOTS-Plus services and the strengthening of TB/HIV collaborative activities. This requires sustained efforts of committed teams in the states and districts, and at the national level. I am confident that with the dedicated staff in the states and districts, and with the support of the strong team at the Central level, we continue to achieve the targets and work towards a TB free India. – (TB Rukegi, Milke hum Rokye Jho)

Dr. L. S Chauhan,
Deputy Director General (TB)
Dte. G. H. Services,
MOHFW, Government of India

Case Detection Rate and Treatment Success Rate in RNTCP areas for 4th quarter 2008/2007

AP- Andhra Pradesh; AR- Arunachal Pradesh; AN- Andaman & Nicobar; AS- Assam; BI- Bihar; CH- Chandigarh; CG- Chhattisgarh; DD- Daman & Diu; DL- Delhi; DN- Dadra & Nagar Haveli; GA- Goa; GU- Gujarat; HR- Haryana; HP- Himachal Pradesh; JK- Jammu & Kashmir; JH- Jharkhand; KA- Karnataka; KE- Kerala; LK- Lakshadweep; MP- Madhya Pradesh; MH- Maharashtra; MN- Manipur; MG- Meghalaya; MZ- Mizoram, NG- Nagaland; OR- Orissa, PD- Puducherry; PN-Punjab; RJ- Rajasthan; SK- Sikkim; TN- Tamil Nadu; TR- Tripura; UP- Uttar Pradesh; UR- Uttarakhand; WB- West Bengal

Estimated New Smear Positive cases / lakh population based on ARTI data for North Zone (Chandigarh, Delhi, Haryana, Himachal Pradesh, Jammu & Kashmir, Punjab, Uttar Pradesh, Uttarakhand) is 95; East Zone (Andaman & Nicobar, Arunachal Pradesh, Assam, Bihar, Jharkhand, Manipur, Meghalaya, Mizoram, Nagaland, Sikkim, Tripura, West Bengal) is 75; South Zone (Andhra Pradesh, Karnataka, Lakshadweep, Puducherry, Tamil Nadu) is 75 and West Zone (Chhattisgarh, Dadra & Nagar Haveli, Daman & Diu, Goa, Gujarat, Maharashtra, Rajasthan) is 80; Orissa is 85;Kerala is 50

1 Projected population based on census population of 2001 is used for calculation of case-detection rate. 1 lakh = 100,000 population

2 Smear positive patients diagnosed include new smear positive cases and smear positive retreatment cases

3 Total patients registered for treatment includes new sputum smear positive cases, new smear negative cases, new extra-pulmonary cases, new others ,relapse,failure,TAD and retreatment others

Estimated New Smear Positive cases / lakh population based on ARTI data for North Zone (Chandigarh, Delhi, Haryana, Himachal Pradesh, Jammu & Kashmir, Punjab, Uttar Pradesh, Uttarakhand) is 95; East Zone (Andaman & Nicobar, Arunachal Pradesh, Assam, Bihar, Jharkhand, Manipur, Meghalaya, Mizoram, Nagaland, Sikkim, Tripura, West Bengal) is 75; South Zone (Andhra Pradesh, Karnataka, Lakshadweep, Puducherry, Tamil Nadu) is 75 and West Zone (Chhattisgarh, Dadra & Nagar Haveli, Daman & Diu, Goa, Gujarat, Madhya Pradesh, Maharashtra, Rajasthan) is 80; Orissa is 85, Kerala is 50

1 Projected population based on census population of 2001 is used for calculation of case-detection rate. 1 lakh = 100,000 population

2 Smear positive patients diagnosed include new smear positive cases and smear positive retreatment cases

3 Total patients registered for treatment includes new sputum smear positive cases, new smear negative cases, new extra-pulmonary cases, new others ,relapse,failure,TAD and retreatment others

Treatment Outcome of New cases for 4th quarter 2007

* Tribal Districts (more than 50% tribal population) ** Poor/Backward District † Tribal & Poor/Backward Districts

Estimated New Smear Positive cases / lakh population based on ARTI data for North Zone (Chandigarh, Delhi, Haryana, Himachal Pradesh, Jammu & Kashmir, Punjab, Uttar Pradesh, Uttarakhand) is 95; East Zone (Andaman & Nicobar, Arunachal Pradesh, Assam, Bihar, Jharkhand, Manipur, Meghalaya, Mizoram, Nagaland, Sikkim, Tripura, West Bengal) is 75; South Zone (Andhra Pradesh, Karnataka, Lakshadweep, Pondicherry, Tamil Nadu) is 75 and West Zone (Chhattisgarh, Dadra & Nagar Haveli, Daman & Diu, Goa, Gujarat, Madhya Pradesh, Maharashtra, Rajasthan) is 80; Orissa is 85, Kerala is 50

1 Projected population based on census population of 2001 is used for calculation of case-detection rate. 1 lakh = 100,000 population

2 Smear positive patients diagnosed include new smear positive cases and smear positive retreatment cases

3 Total patients registered for treatment includes new sputum smear positive cases, new smear negative cases, new extra-pulmonary cases, new others ,relapse,failure,TAD and retreatment others

4 Smear conversion rate not expected for new districts that began implementing RNTCP during 3rd quarter 2008

5 Cure rate and success rate are not expected for new districts that began implementing RNTCP after 4th quarter 2007

Values for grey areas are not expected / reported
