

RNTCP Performance Report, India Second Quarter, 2006

Population in India covered under DOTS and total tuberculosis patients put on treatment each quarter

Annualized new smear-positive case detection rate and treatment success rate in DOTS areas, 1999-2006 *

*Estimated no. of NSP cases - 75/100,000 population per year (based on recent ARTI report)

Revised National Tuberculosis Control Programme **Pursuing High quality DOTS services**

Dear Colleagues,

As you are all aware, the entire country is covered under RNTCP. The programme has successfully met the deadline of quality expansion as planned. As the programme, enters the second phase – phase of consolidation and maintenance – we are expected to strive hard and beat any complacency or routine setting in.

Performance

Review of the performance of states and districts in 2nd quarter 2006 has been satisfactory. The case detection rate for the 2nd quarter 2006 was 71% with a total of 364,799 patients placed on treatment. The success rate amongst the new smear positive PTB cases registered in the 2nd quarter 2005 was 86%. The sputum conversion rate and cure rate among the new sputum positive cases was 89% and 83% respectively.

Over 1500,000 suspects were examined during the quarter and 223,212 sputum positive cases were diagnosed. In addition to the 147,928 new smear positive cases, 101,448 new smear negative cases, 49,038 extra pulmonary cases, 49,580 smear positive re-treatment cases and 16,805 ‘Others’ were also initiated on treatment in this quarter.

Analysis of state wise performance, indicate that 10 states have recorded a decline in case detection rates as compared to the corresponding quarter in previous year. I urge all the programme officers to review hard the reasons of decline and initiate measures to ensure that the case detection rates are achieved and maintained. The initial default rate at the national level is 8%. Efforts made towards strengthening referral for treatment mechanisms will further help to improve case detection rates.

A more disturbing trend noted in some of the states is the decline in treatment success rate. The default rates and death rates continue to be high. An effective programme in the field, supported by good awareness generation and counseling strategy would facilitate early detection of cases and case holding. The only way to ensure treatment success is through ***observing DOT – the basic core principle of DOTS strategy***, and it cannot be undermined for any reason.

Other Initiatives:

Operational Research: The programme has developed and disseminated the OR priorities under RNTCP. At the national level, standing Committee for OR met on May 16, 2006 and 6 OR proposals were approved, including two proposals developed by the National Medical College Task force.

Lab Committee meeting: The programme has been regularly reviewing the quality assurance network in the state. The 7th Lab committee met in May 2006 and reviewed the ongoing activities in the state for establishment of Intermediate Reference laboratories and their accreditation.

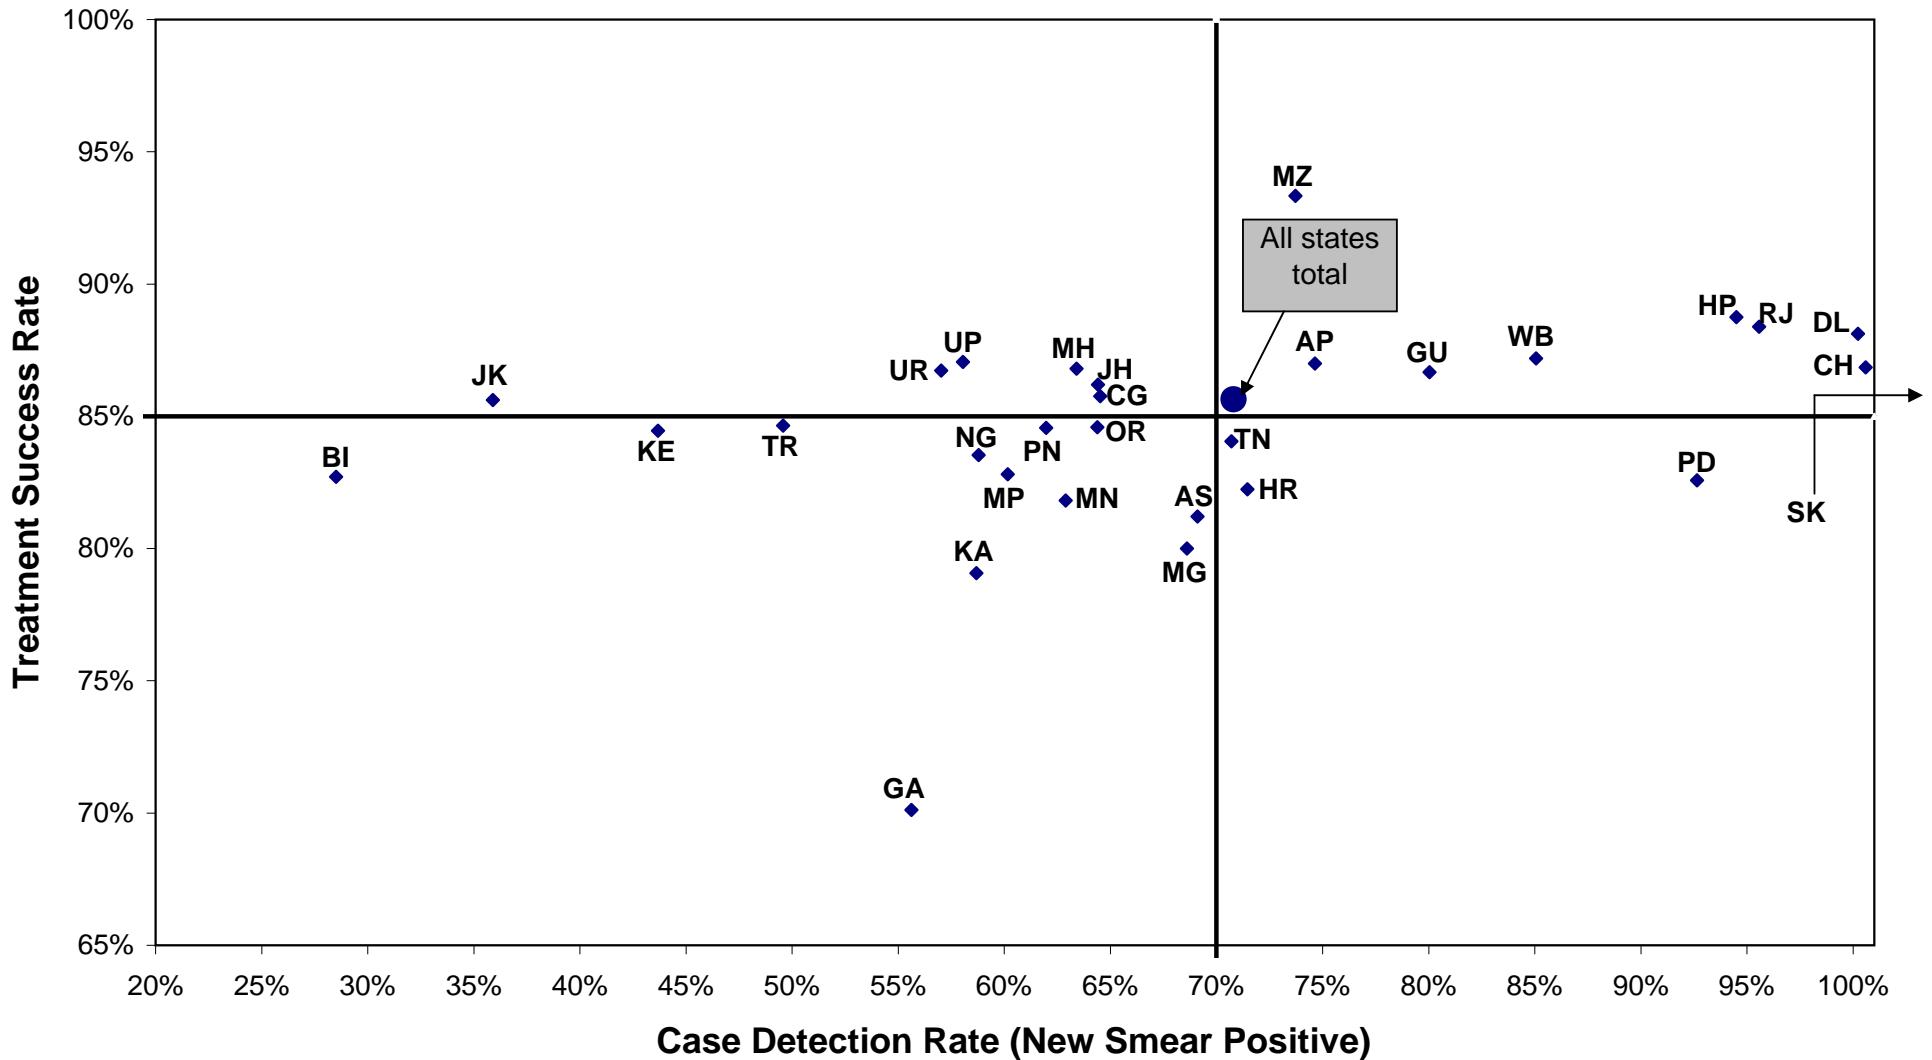

Training for capacity building of IEC officers: National level training programme for the state level IEC officers was organized in June 2006.

The Joint WHO-RNTCP Mission is scheduled from the 3rd Oct to 17 Oct 2006. The mission would provide an valuable opportunity for all of us to review the performance of RNTCP, identify challenges facing the programme and initiate necessary steps to take India towards achieving the TB related Millennium Development Goals and the ultimate desired state of TB control when it ceases to a public health problem.

I urge all the State TB Officers, District TB Officers, MO-TCs, STS, STLS, Lab technicians and all those working for the programme to strive with sincerity and commitment for the noble cause. TB can be controlled only with effective supervision and good programme management.

Dr. L. S Chauhan,
Deputy Director General (TB)
Dte. G. H. Services, MOHFW
Government of India

Values for grey areas are not expected. NR - Not reported till 25th August 2006

Estimated New Smear Positive cases / lakh population based on ARTI data for North Zone (Chandigarh, Delhi, Haryana, Himachal Pradesh, Jammu & Kashmir, Punjab, Uttar Pradesh, Uttarakhand) is 95; East Zone (Andaman & Nicobar, Arunachal Pradesh, Assam, Bihar, Jharkhand, Manipur, Meghalaya, Mizoram, Nagaland, Sikkim, Tripura, West Bengal) is 75; South Zone (Andhra Pradesh, Karnataka, Kerala, Lakshadweep, Pondicherry, Tamil Nadu) is 75 and West Zone (Chhattisgarh, Dadra & Nagar Haveli, Goa, Gujarat, Madhya Pradesh, Maharashtra, Rajasthan) is 80; Orissa is 85

1 Projected population based on census population of 2001 is used for calculation of case-detection rate. 1 lakh = 100,000 population

2 Smear positive patients diagnosed include new smear positive cases and smear positive retreatment cases

3 Total patients registered for treatment includes new sputum smear positive cases, new smear negative cases, new extra-pulmonary cases, smear positive retreatment cases and 'Others'

Summary of performance of Tribal Districts														
Summary of performance of Poor and Backward Districts														

* Tribal Districts (more than 50% tribal population) ** Poor/Backward Districts † Tribal & Poor/Backward Districts

NR indicate states have not reported till 25th August 2006; Values for grey areas are not expected

Note: In 2006, Arunachal Pradesh has 13 districts/reporting units. In year 2005, they were only 6 reporting units. To ensure comparability for the cohort of patients registered in 2005, the treatment outcomes for these patients is being also reported against the earlier reporting units. Similarly in Tamil Nadu a new district/reporting unit - Krishnagiri has been carved out of district Dindigul and the outcome reports for the two districts are being reported against Dindigul.

Estimated New Smear Positive cases / lakh population based on ARTI data for North Zone (Chandigarh, Delhi, Haryana, Himachal Pradesh, Jammu & Kashmir, Punjab, Uttar Pradesh, Uttarakhand) is 95; East Zone (Andaman & Nicobar, Arunachal Pradesh, Assam, Bihar, Jharkhand, Manipur, Meghalaya, Mizoram, Nagaland, Sikkim, Tripura, West Bengal) is 75; South Zone (Andhra Pradesh, Karnataka, Kerala, Lakshadweep, Pondicherry, Tamil Nadu) is 75 and West Zone (Chhattisgarh, Dadra & Nagar Haveli, Daman & Diu, Goa, Gujarat, Madhya Pradesh, Maharashtra, Rajasthan) is 80; Orissa is 85

1 Projected population based on census population of 2001 is used for calculation of case-detection rate. 1 lakh = 100,000 population

2 Smear positive patients diagnosed include new smear positive cases and smear positive retreatment cases

3 Total patients registered for treatment includes new sputum smear positive cases, new smear negative cases, new extra-pulmonary cases, smear positive retreatment cases and 'Others'

4 Smear conversion rate not expected for states that began implementing RNTCP during 2nd quarter 2005

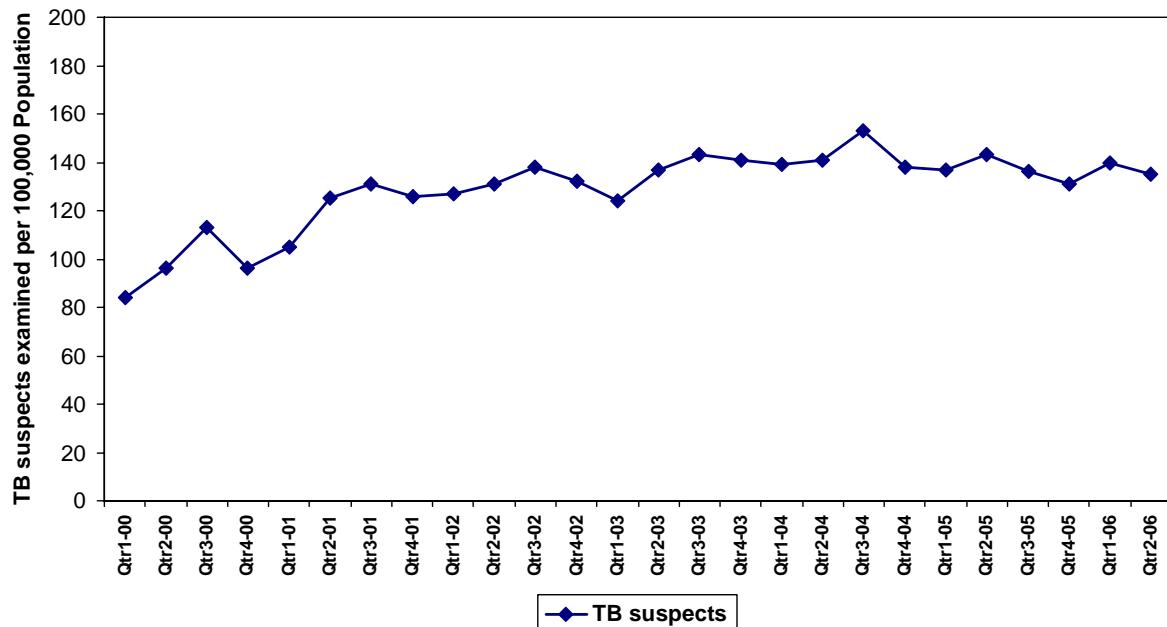

5 Cure rate and success rate are not expected for states that began implementing RNTCP after 2nd quarter 2005

Referral of TB Suspects from VCTC to RNTCP diagnostic units, 2nd quarter 2006
(Reported by Phase-I States Implementing Joint TB-HIV Action Plan)
